- Tamil
- English

EDUCATION

- **B.E - Mechanical Engineering**
  Nandha College of Tech. | CGPA: 6.5
- **Higher Secondary Certificate (HSC)**
  Kongu Kalvi Matric Higher Secondary School | Percentage: 83.3%

WORK EXPERIENCE

Animeta Agritech – Coimbatore

2025 July – Present

Software Developer (React Native)

- Developing cross-platform mobile apps using React Native for agritech domain
- Integrating RESTful APIs and backend services for end-to-end mobile features
- Collaborating with product teams to build intuitive mobile user interfaces
- Maintaining code quality via reviews, testing, and Git version control

Pinnacle Systems – Tiruppur

2023 June - 2025 May

Junior Software Developer

- Built full-stack web applications using React.js, Node.js, and MySQL
- Developed ERP software for textile industry — raw material tracking (yarn, fabric, accessories)
- Created lab management system with automatic result and report generation
- Built civil project tracking platform for leads, quotations, and project management
- Analyzed user needs and provided technical support for debugging and troubleshooting

PROJECTS

ERP Software for Textile

- Enterprise platform to track raw materials (yarn, fabric, accessories) in textile manufacturing. Built with React.js, Node.js, MySQL.

Lab Software for Testing Laboratory

- Registration and tracking system with automatic result computation and report generation for testing labs.

Construction Management Software

- Civil project tracking platform for managing leads, quotations, and end-to-end project lifecycle.

YourFarm Mobile Application

- Developed cross-platform agritech mobile application using React Native for farmers and agricultural services. The application is available on the Google Play Store under the YourFarm platform.

YourFarm Website

- Developed and maintained the live YourFarm website using React.js and Node.js with responsive UI and API integrations for agricultural service management.
